AFSC DUTIES & RESPONSIBILITIES

Performs signals intelligence (SIGINT) activities and operations. Performs operator and analyst duties to exploit noncommunication and communication intelligence production activities. Performs signals exploitation to support electronic warfare (EW) and Information Operations Technologies operations. Utilizes a wide range of complex analysis hardware and software to process signals, including receivers, demodulators, spectrum analyzers, and other associated computer equipment. Uses advanced computer software programs to manipulate and extract intelligence data from electromagnetic emissions. Operates computer terminals for data entry, query, data restructuring, and signals development. Interprets and renders preliminary analysis. Uses analytical aids and related reference material to help identify signals and detect abnormalities. Generates reports, incorporating analytical finds with intelligence information. Develops, manages, reviews, and evaluates intelligence production processes. Ensures signal exploitation activities are conducted in support of warfighter requirements and satisfies national and tactical tasked objectives. Supports intelligence agencies including the National Security Agency, Defense Intelligence Agency, Homeland Security, and the Central Intelligence Agency. Maintains databases of various signal types and activities using computer and hard copy products. Satisfies tasking managing resources for SIGINT activities. Notifies appropriate personnel and work centers of unusual activities or critical situations. May perform these duties aboard aircraft.

Collection and Processing. Collects, analyzes, and identifies communications/non-communication networks to identify various external signal parametrics and perform application of target identification for reporting vehicles updating national databases. Operates electronic search and related equipment. Search, monitor and exploit signal activity throughout the electromagnetic spectrum. Uses graphic and electronic analysis reproductions to determine internal characteristics of signals and to discern communications structures to extract intelligence and determine usage. Extracts electromagnetic emissions from real-time and recorded media, and performs technical and data analysis. Prepares and forwards media of selected transmissions. Plans, organizes, and directs signals exploitation activities.

Communication Signals Intelligence. Performs graphic and electronic analysis as related to various Communication Intelligence (COMINT) networks. Display, analyze, demodulate, demultiplex, identify, and report communication signals and their users found in the radio frequency spectrum. Performs analysis and identification of known and unknown protocol and communication signals in support of Cyber Network Operations.

Technical Signals Intelligence. Uses graphic and electronic analysis to determine internal characteristics of signals and to discern communications structures to extract intelligence and determine usage. Assembles operational and

technical information on Foreign Instrumentation Intelligence (FISINT), PROFORMA and EW networks. Collects, processes, analyzes and identifies operational and technical data of signals through collection and processing of communication/non-communication networks. Disseminates highly perishable information supporting COCOM/Theater/National Requirements.

Electronic Intelligence. Assembles operational and technical information on Electronic Intelligence (ELINT), Collects, processes, analyzes and identifies operational technical measurable and descriptive characteristics of electronic signals through collection and processing of non-communication signals; as related to radar, weapons, or platforms. Evaluates records, operator logs, formats technical reports, and data from other activities and correlates the activity with other intelligence sources. Plans, organizes, and directs electromagnetic signals exploitation activities. Disseminates highly perishable information supporting COCOM/Theater/National Requirements. Uses advanced computer software programs to manipulate and extract intelligence data from electromagnetic emissions updating national databases.
